SUBJECT INDEX

Acetylcholinesterase
A flow microcalorimetric study of the inhibition of acetylcholinesterase by catecholamine derivatives, 221
Activation energy
The effect of temperature lag on activation energy determined by non-isothermal analysis, 341
1-Adamantanol
An investigation of solid-state phase transitions in 1- and 2-adamantanol by ^{13}C CP–MAS NMR, 295
2-Adamantanol
An investigation of solid-state phase transitions in 1- and 2-adamantanol by ^{13}C CP–MAS NMR, 295
Alkan-1-ol
Studies of thermodynamic properties of binary mixtures containing an alcohol. Part XV. Excess molar enthalpies of alkan-1-ol + methyl ethyl ketone and + methyl isobutyl ketone at 298.15 K, 257
n-Alkane
Excess volumes of cycloalkanol + *n*-alkane systems in terms of an associated solution theory with a Flory equation of state contribution, 347
Aminophenols
Structure elucidation of aminophenols–iodine redox products by emanation thermal analysis, 237
Anisotropy
On the anisotropy of thermal expansion and electrical conductivity in triglycine selenate single crystals, 1

BAPS
Thermal decomposition of basic aluminium potassium sulphate (BAPS) in hydrogen atmosphere, 187
Barium bromate
Thermal decomposition of gamma-irradiated barium bromate, 273
$BaZrO_3$
Enthalpy increments of $BaZrO_3$ and $SrZrO_3$ —a reply to the comments of Cordfunke and Konings, 337
Benzodiazepines
Thermoanalytic and spectral studies of benzodiazepines. Part I. Lorazepam (in French), 61
1,3-Butadiene
Aromatisation of 1,3-butadiene under pressure, 99
poly-2-*tert*-Butyl-5-vinyltetrazole
Thermal decomposition of tetrazole-containing polymers. Part II. Thermolysis of poly-2-*tert*-butyl-5-vinyltetrazole, 209

^{13}C CP–MAS NMR
An investigation of solid-state phase transitions in 1- and 2-adamantanol by ^{13}C CP–MAS NMR, 295
$C_{22}H_{46}$
Enthalpies of fusion and solid–solid transition of even-numbered paraffins $C_{22}H_{46}$, $C_{24}H_{50}$, $C_{26}H_{54}$ and $C_{28}H_{58}$, 265
$C_{24}H_{50}$
Enthalpies of fusion and solid–solid transition of even-numbered paraffins $C_{22}H_{46}$, $C_{24}H_{50}$, $C_{26}H_{54}$ and $C_{28}H_{58}$, 265
$C_{26}H_{54}$
Enthalpies of fusion and solid–solid transition of even-numbered paraffins $C_{22}H_{46}$, $C_{24}H_{50}$, $C_{26}H_{54}$ and $C_{28}H_{58}$, 265
$C_{28}H_{58}$
Enthalpies of fusion and solid–solid transition of even-numbered paraffins $C_{22}H_{46}$, $C_{24}H_{50}$, $C_{26}H_{54}$ and $C_{28}H_{58}$, 265
Calcination
Changes in textural properties of limestone and dolomite during calcination, 125
Carbon deposition
Thermoanalytical studies of carbon deposition on Pt/Al_2O_3 and $Pt–Sn/Al_2O_3$ catalysts for dehydrogenation of butane in the presence of hydrogen, 9
Catecholamine derivatives
A flow microcalorimetric study of the inhibition of acetylcholinesterase by catecholamine derivatives, 221
Cd–Zn
Thermodynamic study of Cd–Zn. Partial pressures and thermodynamic properties of solid and liquid solutions rich in zinc (in French), 25
Chelates
Analysis of thermogravimetry curves to determine the mechanism of dissociation of 2-thiohydantoin and its derivatives and their metal chelates, 323
Chlorobenzenes
Thermodynamic study of chlorobenzenes (in French), 81
Chloropropionates
Study of copper(II) chloropropionates complexed with imidazole or methyl substituted imidazoles, 135

Cyano complexes
Thermal stability of $[phenyl_2I]^+$ cyano complexes containing silver, chromium and cobalt, 109
Cycloalkane
Excess volumes of cycloalkanol + cycloalkane binary systems in terms of an associated solution theory with a Flory equation of state contribution, 39
Cycloalkanol
Excess volumes of cycloalkanol + cycloalkane binary systems in terms of an associated solution theory with a Flory equation of state contribution, 39
Excess volumes of cycloalkanol + *n*-alkane systems in terms of an associated solution theory with a Flory equation of state contribution, 347

2,3-Dimethyl-1-phenylpyrazol-5-one
Proton–ligand ionization equilibria of 2,3-dimethyl-1-phenylpyrazol-5-one in mixtures of water and dioxane: a thermodynamic study, 301
Dioxane
Proton–ligand ionization equilibria of 2,3-dimethyl-1-phenylpyrazol-5-one in mixtures of water and dioxane: a thermodynamic study, 301
1,3-Dioxolane
Excess enthalpies of binary mixture containing 1,3-dioxolane and cyclic compounds, 149
Dolomite
Changes in textural properties of limestone and dolomite during calcination, 125

Flory equation
Excess volumes of cycloalkanol + cycloalkane binary systems in terms of an associated solution theory with a Flory equation of state contribution, 39
Excess volumes of cycloalkanol + *n*-alkane systems in terms of an associated solution theory with a Flory equation of state contribution, 347

Graphite intercalation compounds
Characterization of graphite intercalation compounds by thermogravimetric analysis, 201

Heat-flux-type DSC
Heat capacity measurement by heat-flux-type DSC on cooling and heating cycles at low scan rates, 117
1-(2′-Hydroxybenzyl)-2-(2′-hydroxyphenyl)benzimidazole complexes
Thermal and spectral studies of 1-(2′-hydroxybenzyl)-2-(2′-hydroxyphenyl)benzimidazole complexes of iron(III), cobalt(II), nickel(II) and copper(II), 313

Imidazole
Study of copper(II) chloropropionates complexed with imidazole or methyl substituted imidazoles, 135

K_2O
The phase diagrams of Na_2O and K_2O with Nb_2O_5 and the ternary system Nb_2O_5–Na_2O–Yb_2O_3, 157

Limestone
Changes in textural properties of limestone and dolomite during calcination, 125
Lorazepam
Thermoanalytic and spectral studies of benzodiazepines. Part I. Lorazepam (in French), 61
Low scan rates
Heat capacity measurement by heat-flux-type DSC on cooling and heating cycles at low scan rates, 117

Melting points
A simple computer approach for determining melting points, 333
Methyl ethyl ketone
Studies of thermodynamic properties of binary mixtures containing an alcohol. Part XV. Excess molar enthalpies of alkan-1-ol + methyl ethyl ketone and + methyl isobutyl ketone at 298.15 K, 257
Methyl isobutyl ketone
Studies of thermodynamic properties of binary mixtures containing an alcohol. Part XV. Excess molar enthalpies of alkan-1-ol + methyl ethyl ketone and + methyl isobutyl ketone at 298.15 K, 257

Na_2O
The phase diagrams of Na_2O and K_2O with Nb_2O_5 and the ternary system Nb_2O_5–Na_2O–Yb_2O_3, 157
Nb_2O_5
The phase diagrams of Na_2O and K_2O with Nb_2O_5 and the ternary system Nb_2O_5–Na_2O–Yb_2O_3, 157

1,8-Octamethylenediammonium chloronickelates
Preparation and study of 1,8-octamethylenediammonium chloronickelates, 195
Oxalates
Thermal decomposition of oxalates. Part

XXIV. Effect of the sample preparation and environmental atmosphere on the thermal stability of silver oxalate, 49

N-Phenyl-*O*-acetyl-mandelohydroxamic acid
Thermal and spectroscopic study of the complexes formed between *N*-phenyl-*O*-acetyl-mandelohydroxamic acid and vanadium(V), 171

$[Phenyl_2I]^+$ cyano complexes
Thermal stability of $[phenyl_2I]^+$ cyano complexes containing silver, chromium and cobalt, 109

Polyol
Thermokinetics and rheological properties of polyurethane reaction involving a new polyol, 281

Polyurethane
Thermokinetics and rheological properties of polyurethane reaction involving a new polyol, 281

Pt/Al_2O_3 catalyst
Thermoanalytical studies of carbon deposition on Pt/Al_2O_3 and $Pt–Sn/Al_2O_3$ catalysts for dehydrogenation of butane in the presence of hydrogen, 9

$Pt–Sn/Al_2O_3$ catalyst
Thermoanalytical studies of carbon deposition on Pt/Al_2O_3 and $Pt–Sn/Al_2O_3$ catalysts for dehydrogenation of butane in the presence of hydrogen, 9

Rheological properties
Thermokinetics and rheological properties of polyurethane reaction involving a new polyol, 281

Silver oxalate
Thermal decomposition of oxalates. Part XXIV. Effect of the sample preparation and environmental atmosphere on the thermal stability of silver oxalate, 49

Sn–Te–I
On the ternary system Sn–Te–I: investigation of the SnI_2–Te, TeI_4–SnI_2 and SnTe–TeI_4 subsections, 247

SnI_2
On the ternary system Sn–Te–I: investigation of the SnI_2–Te, TeI_4–SnI_2 and SnTe–TeI_4 subsections, 247

SnTe
On the ternary system Sn–Te–I: investigation of the SnI_2–Te, TeI_4–SnI_2 and SnTe–TeI_4 subsections, 247

Sodium salts
Solubility data of some sodium salts in molten urea Part I., 231

$SrZrO_3$
Enthalpy increments of $BaZrO_3$ and $SrZrO_3$ —a reply to the comments of Cordfunke and Konings, 337

TeI_4
On the ternary system Sn–Te–I: investigation of the SnI_2–Te, TeI_4–SnI_2 and SnTe–TeI_4 subsections, 247

Temperature lag
The effect of temperature lag on activation energy determined by non-isothermal analysis, 341

5,10,15,20-Tetrakis(4-methoxy4-phenyl)-21H,23H-posphine
Structural, thermal and electrical studies of pyrazinebridged 5,10,15,20-tetrakis(4-methoxyphenyl)-21H,23H-porphine cobalt(II), 17

Tetrazole
Thermal decomposition of tetrazole-containing polymers. Part II. Thermolysis of poly-2-tert-butyl-5-vinyltetrazole, 209

Textural properties
Changes in textural properties of limestone and dolomite during calcination, 125

2-Thiohydantoin
Analysis of thermogravimetry curves to determine the mechanism of dissociation of 2-thiohydantoin and its derivatives and their metal chelates, 323

Titanium(IV) oxide
Synthesis and characterization of a hydrated titanium(IV) oxide, 89

Triglycine selenate
On the anisotropy of thermal expansion and electrical conductivity in triglycine selenate single crystals, 1

Urea
Solubility data of some sodium salts in molten urea Part I., 231

Vanadium(V)
Thermal and spectroscopic study of the complexes formed between *N*-phenyl-*O*-acetyl-mandelohydroxamic acid and vanadium(V), 171

Wool wax alcohols
Thermoanalytical and gas chromatographic evaluation of wool wax alcohols supported by principal component analysis, 177

Yb_2O_3
The phase diagrams of Na_2O and K_2O with Nb_2O_5 and the ternary system Nb_2O_5–Na_2O–Yb_2O_3, 157
